

At page 37, line 3, add the following paragraphs:

--In addition to the report template file that is developed using Microsoft Excel®, the dental software of the present invention includes a PowerPoint® presentation by taking suitable information from a Microsoft Excel® report file and copying it into appropriate locations in a template. For example, the program can import photographs, radiographs, and anything that is a designated photo, into slides in the PowerPoint®. By way of example, the list of photographs currently used includes:

In this fashion, the PowerPoint® presentation is filled in its entirety by the software of the present invention. An exemplary set of slides from such a PowerPoint® is illustrated in Figs. 14 to 19 wherein photographs 242 and radiographs 244, 246 have been imported into the slide display. Other information, consistent with the diagnostic output report, is included within the slide display as well. Such information is in the nature of diagnostic
